PROFESSIONAL SUMMARY

SQA Engineer with nearly 2 years at AKIJ iBOS Limited testing cloud-based, multi-tenant SaaS products (HRMS, POS, ERP Payroll, AI job portal) across web, mobile, and API layers. Experienced in Playwright (POM) automation, API and performance testing, and in building QA tooling with Python and JavaScript/TypeScript.

WORK EXPERIENCE

AKIJ iBOS Limited, Dhaka

SQA Engineer | October 2026 – Present

- Own end-to-end QA for the PeopleDesk HRMS Performance Management System and Training & Development modules, across functional, regression, integration, API, and E2E testing.
- Maintain and extend the modular Playwright (POM) automation framework covering 11 PeopleDesk modules (18 page classes).
- Build mobile test automation for the PeopleDesk Android app using Maestro Studio & Mobilewright (TypeScript).
- Triage defects with Development and Business Analyst teams and deliver testing on schedule in deadline-driven environments.

Junior SQA Engineer | January 2025 – September 2026

- Tested PeopleDesk HRMS modules (Performance Management System, Training & Development, Asset Management, redesigned Payroll) through functional, regression, integration, API, and end-to-end (E2E) testing.
- Migrated the existing Selenium suite to Playwright using the Page Object Model (POM), improving maintainability and regression coverage.
- Led performance testing for a system supporting 14,000+ employees, diagnosing slowdowns during peak login hours (7:00–8:00 AM).
- Tested initial builds of Managerium POS (core retail workflows, system integrations) and ERP Payroll (workflows, calculations, business requirement validation).
- Worked with Development and Business Analyst teams to triage defects and deliver testing on schedule.

TECHNICAL SKILLS

- **Testing:** Manual (web, mobile iOS/Android), API (Postman, Newman), Performance (JMeter, Locust), Test case design, Defect management.
- **Automation:** Playwright (POM), Selenium, Maestro Studio, Mobilewright.
- **Tools:** Jira, ClickUp, Git/GitHub.
- **Programming:** JavaScript, Python.
- **Concepts:** SDLC, STLC, Agile/Scrum, OOP, Page Object Model (POM).
- **Specializations:** Test automation, multi-tenant SaaS testing, API and performance testing.

FEATURED PROJECTS

Industrial QA Projects

- **PeopleDesk (HRMS):** Tested PMS, Training & Development, Asset Management, and Payroll; created test cases and automation scripts, performed API/performance testing, and documented defects.
- **POS Managerium:** Tested initial builds of a multi-store retail/POS system, covering sales workflows, business logic, and integrations.
- **NextJobz:** Tested an AI-powered job portal, covering key user workflows, functional requirements, UI behavior, and reliability.

Automation & QA Tooling (GitHub)

- **Playwright Framework (Login, Checkout, Cart, Inventory):** POM architecture with GitHub Actions CI/CD. View
- **DroidLogsPilot:** Python CLI with a Flask web UI that captures Android API call logs from ADB logcat, with live log view, severity filtering, and PDF reports. View
- **API Testing with Postman & Newman:** REST API Automation(Student Management)
- **Performance Testing with JMeter:** E-Commerce , Thaura-AI
- **Manual Testing & Bug Reports:** Chaldal, Mahfil-App

EDUCATION

B.Sc. in Computer Science & Engineering
State University of Bangladesh — 2024

CERTIFICATIONS & TRAINING

- **Advanced SQA & Cybersecurity —** IT Training BD, Certificate No: ITB-B23-4314. Verify
